Use of information and image (including photographs and video recordings)

Occasionally we may take photographs/videos of the children at our school. We may use these images on school display boards, in pupil books or learning journeys as evidence of their achievements, in our school's prospectus or in other printed publications that we produce as well as on our website. We may also make video or webcam recordings for school-to-school conferences, monitoring and evaluating learning and teaching, recording performance e.g. school plays and productions or other educational use.

From time to time, our school may be visited by the media who will take images or record interviews or take film footage of a visiting dignitary or other high profile or charity event. These types of activities help to raise the profile of the school in the local and wider community as well as celebrate the achievements of the pupils and the work of the school community. Pupils will often appear in these images or recordings, which may appear in local or national newspapers, or on radio or televised programmes. Please note that in this modern age, many newspapers now have online copies of their papers and some also tag photos and articles to their newspaper's social network sites. The school also now has a twitter account and we regularly use this form of social media to quickly share events as they take place.

To comply with the Data Protection Act 1988, we need your permission before we can photograph or make any recordings of your child.
