

# Team One Knowledge Organiser Summer One

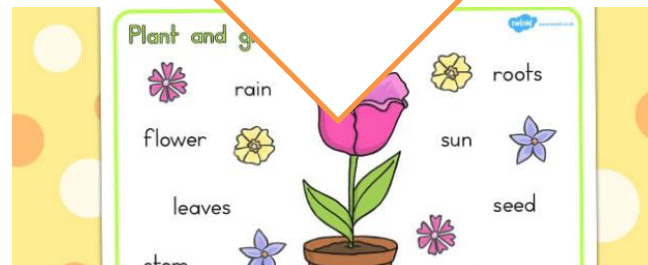

## Key books this term

This term we will continue to build on our fantastic literacy skills by looking at these stories. From these we shall write lists, character descriptions, instructions and use these to inspire us to write our own stories. This will be supported by daily phonic lessons.

## Plants

We shall look at the different parts of the plant and what each part does. We shall plant beans and watch them grow over the term. Planting them in different places to test the best place to grow them

Where will our bean seeds grow the best?

## Maths

This term we shall look at fractions and how to share items equally. We will learn how to tell the time focusing on o'clock and half past. Please encourage your child to use a clock independently.

## Smoothies

We shall design and make our own healthy smoothies. Learning how to prepare and handle fruit and vegetables safely. We shall evaluate them to see how and if we can improve them.

We shall look at the artist Giuseppe Arcimboldo and create our very own food inspired art work.

On a Friday afternoon coach Craig will teach the children PE and Mrs Hunt will teach them music.
